

ANNUAL PROFESSIONAL PERFORMANCE REVIEW (APPR) TEACHER OBSERVATION REPORT

Teacher Name: Diana Rendon-guerrero Teacher ID: 1635564
27Q105-P.S. 105 The Bay
School Year: 2023-2024 School Name/DBN: School

CLASSROOM OBSERVATION (OBS):

In each observation, all components for which there is observed evidence must be rated. Each form must contain lesson-specific evidence for each of the components observed during a classroom observation.

This observation was: (check one)

Formal Observation (full period)

Informal Observation (15 minutes minimum)

Date of Observation: 05/16/2024 Time/Period: 9:02-9:49

Component	Ratings
1a (obs): Demonstrating knowledge of content and pedagogy Ms. Rendon, you effectively demonstrated your knowledge of phonemic awareness routines by leading the students in adding, taking away, and substituting phonemes. Your use of hands-on modeling, is a pedagogically sound strategy for teaching young learners phonemic awareness. During the lesson you stated, "The word is ome and I add a huh; students responded chorally, "Home." For the direct instruction portion, you explained the concept of the main idea and details using relatable examples such as ice cream, which helped students connect with the content. For example, "My main idea is chocolate, my details are like my sprinkles and cherries."	3- Effective
1e (obs): Designing coherent instruction The lesson you planned was structured with a clear progression from phonemic awareness to the main lesson on main ideas and details. You set a timer for small group work and provided a clear learning target: "I can identify the main idea and details after reading a passage." The students were consistently engaged in tasks that supported this outcome and the activities provided opportunities for higher-level thinking. Students had to discern between main ideas and supporting details, requiring comprehension and analysis. During your small group lesson with Gary, Kamryn, Elijah, and Mekhi, students read a passage about ice cream and identified the main idea and details using highlighters and graphic organizers. The activities of reading the passage, highlighting details, and using graphic organizers directly aligned with the learning target of identifying main ideas and details. In addition, you provided a variety of appropriately challenging materials and resources, such as, a shared text "The Joy of Ice Cream," highlighters, and graphic organizers shaped like ice cream cones. Finally, time is allocated reasonably to different parts of the lesson, ensuring a balance between instruction and student practice.	N/A

2a: Creating an environment of respect and rapport During the lesson you consistently utilized respectful and encouraging language, fostering a positive classroom environment. For example, you stated, "Exactly, write it just like that.", "Good job.", and "Super proud of you." You addressed students by their names to acknowledge their efforts and contributions. Students participated willingly; they chorally blended the phonemic sounds into words and contributed to the small group discussion by stating their ideas about the main idea and details of the passage.	3- Effective
2d: Managing student behavior Ms. Rendon, you managed student behavior with reminders and redirection, when there were moments where students were off-task and distracted. For example, when Mekhi began to tell all about his experience with ice cream, you stated, "Stay focused, we will talk about that tomorrow." The student behavior was generally appropriate and your response to misbehavior was effective. For example, when Isaac began to display signs of dysregulation, you pivoted his assignment.	3- Effective
3b: Using questioning and discussion techniques While you asked some open-ended questions that prompted students to think and respond about the main idea and details, the lesson primarily involves questions with single correct answers, limited student-to-student interaction, and uneven participation in discussions. For example, "Ms. Rendon: What is the main idea of this passage? Student: Ice cream Teacher: What about ice cream? Student: Different types of topics and flavors." You asked students to explain their reasoning at times, but the depth of reasoning is often limited. For example, Ms. Rendon: "What's the main idea again?" Student: "It brings joy to everyone that eats it." Ms. Rendon: "Eats what?" Student: "Ice cream." In addition, many of the questions you asked had a single correct answer, such as identifying flavors or details from the passage.	2- Developing
3c: Engaging students in learning Ms. Rendon, the lesson was engaging, with hands-on activities (highlighting details, writing on ice cream cones) and relevant content that kept students interested. You gave them a shared text, 'The Joy of Ice Cream'." and utilized a variety of instructional strategies, such as shared reading and small group work, to maintain student engagement. The materials were engaging and varied (text, highlighters, graphic organizers), and you adapted resources to meet individual student needs, making the activities appropriately challenging and accessible. For example, you provided individualized support (e.g., drawing lines on organizers, using finger tracking for reading) to support students' intellectual engagement with their tasks. Example: "Let's go to the next paragraph. Kamryn, take it away." (Pointed to show her where to start.) Finally, the instructional student groups were organized thoughtfully to maximize learning and build on students' strengths.	3- Effective
3d: Using assessment in instruction Ms. Rendon, you used informal assessment by asking questions and checking for understanding during the lesson, although there is limited evidence of systematic assessment. When you asked students "What are some flavors of the ice cream mentioned in the passage?", you gave them highlighters to highlight the flavors but did not document which students could independently identify all the flavors or note any specific needs with identifying details. While you provided some individual feedback, there is room for more targeted and consistent assessment practices, as well as providing feedback that will help guide students and improve	3- Effective

their learning process. One example included the following interaction: Ms. Rendon: Now, what is one detail from the passage? Student: (Began to read the whole paragraph.) Ms. Rendon: Hold on, remember what you highlighted? Student: (Read flavors.) Ms. Rendon: What are those? Toppings or flavors. Student: Flavors.

ASSESSMENT OF PREPARATION AND PROFESSIONALISM (P&P):

In this section of the form, evaluators should rate evidence for components 1a, 1e, and 4e that was observed within fifteen (15) school days prior to the classroom observation as part of an assessment of a teacher's preparation and professionalism. Each form must contain teacher-specific evidence for each of the components observed.

Component	Ratings
1a (p&p): Demonstrating knowledge of content and pedagogy Your lesson plan demonstrated the effective attributes of 1A. You planned a Heggerty routine that supported students in improving their phonemic awareness. Although your main lesson was short, your slides indicate your knowledge of the concept of main idea and details. You planned instructional strategies that supported students in identifying main ideas and details (engaging in shared reading, using a highlighter, completing a graphic organizer). You utilized different levels of text to ensure students reading proficiency levels would not prevent them from applying the skill.	3- Effective
1e (p&p): Designing coherent instruction Your lesson plan demonstrated the effective attributes of 1E. Your plan had a clear structure; beginning with a warm-up to support proficient independent reading, a main lesson, small group lessons that included shared reading and discussion. The differentiated activities provided opportunities for higher level thinking as students had to determine the main idea of a passage and identify the details that supported that main idea. Each group was based not just on students' academic abilities but their abilities as learners.	3- Effective
4e (p&p): Growing and developing professionally	N/A

Additional Evaluator Notes (please attach more pages, as necessary):

Ms. Rendon, your lesson shows evidence of effective planning and execution. The learning activities are well-matched to the instructional outcomes, provide opportunities for higher-level thinking, utilize a variety of materials and resources, are thoughtfully organized in terms of student grouping, and have a well-structured plan with appropriate time allocations. The lesson includes engaging activities that connect to students' interests and experiences, such as the ice cream example. You created a warm, supportive classroom atmosphere where students feel valued and encouraged.

Your next steps for continued pedagogical growth are around questioning and discussion and using assessment in instruction. Work on framing questions that require higher-order thinking and promote deeper discussion and encourage students to think beyond single correct answers and explore multiple perspectives. Use open-ended questions that stimulate critical thinking, such as "Why do you think ice cream brings joy to people?" instead of factual recall questions. Encourage students to respond directly to one another's ideas to foster a more interactive and collaborative discussion environment. Implement strategies such as think-pair-share or small group discussions where students can engage more directly with each other's thoughts and ideas. As far as using assessment in instruction, incorporate more systematic assessment techniques to gauge student understanding and provide targeted feedback, helping guide and improve their learning process. Allow more opportunities for them to independently demonstrate their ability to apply the skills
